

# The OUT-OF-THE-WAY ice maker **Horizon Elite™** Series

## Improved aesthetics

Less equipment is in view with this ice machine. It can be located under a counter or in a back room, up to 75 ft away from the dispenser. Fountain areas are less cluttered without soffits or other structures to hide equipment. The additional space can be used to reduce clutter or for other signage to promote your business.

## Cleaner dispensers

Relocating the ice machine from on top of the dispenser gives full access to the dispenser ice storage area. This eliminates the expense to remove heavy ice machines each time the dispenser needs cleaning, and allows for better access to the ice storage area for more thorough sanitizing.

## Better customer experience

Automatically filling the dispenser eliminates manual filling and the interruptions it causes customers, often at peak usage periods. Additionally, scheduled maintenance can be performed out of the way of customers, allowing the dispenser to be used without disruption.
