

A NEW AGE IN FOLLETT MEDICAL-GRADE REFRIGERATION

TEREF6 series compressor-free undercounter refrigerators for medical, pharmaceutical and laboratory applications harness the power of solid-state technology to deliver precise temperature control.

- 5.5 cubic feet of storage capacity in an ADA-height undercounter refrigerator
- Near silent operation
- Few moving parts to reduce fatigue and improve longevity

Precise temperature

The solid-state refrigeration system fluctuates with stability at just ± 1 C and is always on to deliver uniform cooling for safe vaccine and breast milk storage.

Near-silent, less than 35 dB

With solid-state technology, these medical-grade refrigerators don't have a compressor resulting in quiet operation making them ideal for placement in patient rooms.

More storage space

5.5 cubic feet of storage capacity in an ADA-height undercounter refrigerator

CDC vaccine compliant

These thermoelectric refrigerators were designed to meet or exceed the recommendations of the Centers for Disease Control (CDC) to keep vaccines safe.

Freeze protection

Solid-state refrigeration reduces the risk of freeze zones with precise temperature stability and uniformity.

Reliable

Our medical-grade solid-state systems have no moving parts to fatigue and fail over time.

PHARMACY

Safe for vaccine storage

PATIENT BEDSIDE

Quiet operation
(<35 dBA)

BREAST MILK

Meets FDA and CDC recommendations

CLEANROOM

Complies with both USP
<797> and USP <800>
standards
