CAUTION!

- This appliance should be connected by a qualified person in accordance with applicable codes.
- If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.
- Connect to potable water supply only.
- This appliance can be used by children aged 8 years and above and persons with reduced physical, sensory, or mental capabilities, or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children should be supervised to ensure that they do not play with the appliance.
- This appliance is intended to be used for household and similar applications such as staff kitchen areas in shops, offices and other working environments; farm houses and by clients in hotels, motels and other residential type environments; bed and breakfast type environments; catering and similar non-retail applications.
- WARNING! To avoid a hazard due to instability of the appliance, it must be fixed in accordance with the instructions.
Read and complete the following 8 installation steps

1. Unpack
2. Site preparation
3. Bin preparation
4. Louvered docking assembly
5. Ice transport tube
6. External connection
7. Internal connection
8. Front cover
Carefully unpack and inspect the contents of your Follett ice machine.

1. Unpack ice machine

1.1 Unpack ice machine

1. Unpack ice machine from packaging:
   - Remove all packaging materials.

2. Inspect the ice machine:
   - Check for any visible damage.
   - Ensure all parts are present.

3. Do not tilt the ice machine to access bolts:
   - This may cause compressor damage.

4. Remove bolts:
   - Use the recommended tool.
   - Ensure bolts are tightened correctly.

5. Lift ice machine:
   - Use the handles for lifting.
   - Position the ice machine on its intended location.

6. Secure the ice machine:
   - Use the bolts to secure the ice machine to the base.

7. Final inspection:
   - Check all connections and settings.
   - Ensure the ice machine is set up correctly.

Remainder of the page contains instructions for further setup and use of the ice machine.
Prepare the installation site.

Provide drainage, water supply and electrical power to within 6 feet (2m) of ice machine in accordance with local and national codes. Outdoor installation is not recommended and will void warranty.

2.1 Installation site requirements

Electrical ➊
- 120/60/1-5 amps

Potable water supply ➋ (3/8” push-in internal connection, 3/8” OD tubing required)
- 10-70 psi (69-483kpa)
- 45-90 F (7-32 C)
- Follett recommends the use of an in-line water filtration system (item# 00130286)
- This equipment is to be installed with adequate backflow protection to comply with applicable federal, state, and local codes

Drain ➌ (3/4” Barb)
- Minimum 8” radius on silicone drain line. Drain line from the ice machine must have at least 1/4” per foot pitch (6,4mm/0,3m).

Refrigeration lines ➍
- 7/8” ø (22,4 mm) diameter suction line (insulated) ➎
- 3/8” ø (9,5 mm) liquid line ➏
Prepare the bin.

3.1 Bin top preparation

• Remove protective tape from gaskets

3.2 Bin top preparation

• Apply gaskets 1
• Install shuttle actuator 2 through bin top and secure with locking nut 3

BEFORE PROCEEDING

Prior to installing the louvered docking assembly, ensure that the drain fitting is oriented (right or left) correctly for your installation. An optional straight drain fitting is also supplied. You may need to remove the back panel of the docking assembly in order to re-orient or change the drain fitting. Replace back panel prior to mounting the docking assembly.
Install the louvered docking assembly.

Louvered docking assembly

4.1 Louvered docking assembly

- Mount louvered docking assembly 1
- “Rough-in” the refrigerant piping 2
Install the ice transport tube.

5.1

- Slide insulation onto ice transport tube
- Heat end of transport tube in cup of 160 F (71 C) hot water to soften and spread with pliers ⃣ before making connection to ease assembly
- Connect ice transport tube to coupling on louvered docking station ⃣
- Connect ice transport tube to shuttle actuator ⃤
Connect utilities to louvered docking assembly.

6.1 Water and drain

- Rough-in ice machine potable water supply ①.
- 3/8” push-in connection will be made at shut-off valve inside machine
- Remove access panel if necessary ②.
- Connect the silicone tubing to the ice machine 3/4” drain barb ③.
- Assemble the 3/4” barb x 3/4” FPT to the 3/4” MPT x 1” slip. Connect the other end of the silicone tubing to the 3/4” barb ④.
- Connect the 1” slip fitting to the 1” stand pipe/drain ⑤.

**Note:** Minimum 8” radius on silicone drain line. Drain line from the ice machine must have at least 1/4” per foot pitch (6,4mm/0,3m).
- Apply Petrol-gel to barbed drain fitting ⑥
- Replace access panel.

6.2 Refrigerant lines

- Braze supplied quick-connect lines onto stub-ins ①.
Connect louvered docking assembly to ice machine.

**Internal connections**

**7**

**7.1 Ice transport tube installation**
- Slide ice machine into louvered docking assembly ensuring that drain tube is fully seated on barbed drain fitting.
- Insert ice transport tube all the way into coupling and tighten nut firmly.

**7.2 Water line**
- Insert potable water line into valve.

**7.3 Refrigeration lines**
- Evacuate line set.
- Connect self-sealing liquid and suction line fittings.

**7.4 Power cord**
- Remove twist tie.
- Carefully pass cord thru opening and plug into wall outlet.
7.5 Power cord

- Position plate into opening and secure with supplied screw

7.6 TDS switch

- Set the TDS switch on the electrical box:
  HIGH: for extended service life
  LOW: for low-scale water
Install front cover to ice machine.

8.1 Install condensing unit

- Complete installation of condensing unit or connection to rack system.
- Required rack system capacity at 0 F (-18 C) evaporator (EPR supplied by installer).
  - 1810N: 15,700 Btu/hr (3956 kcal/hr)
  - 2110N: 18,200 Btu/hr (4586 kcal/hr)

8.2 Install ice machine front cover

- Slide ice machine cover over machine ensuring that tabs on back of cover slip under louvers on back of louvered docking assembly 1
- Insert and tighten two screws through cover and into louvered docking assembly 2

NOTICE

Ice machine MUST be sanitized prior to operation!
Consult Operation and Service Manual provided with ice machine for sanitizing instructions.
