

The OUT-OF-THE-WAY ice maker **Horizon Elite™** Series

Improved aesthetics

Follett's industry-exclusive ice-through-a-tube technology allows you to automatically fill a dispenser from up to 75' away. With the heat and noise of the ice machine away from the beverage station, your customers get an upscale experience.

Cleaner dispensers

Relocating the ice machine from on top of the dispenser gives full access to the dispenser ice storage area. This eliminates the expense to remove heavy ice machines each time the dispenser needs cleaning and allows for better access to the ice storage area for more thorough sanitizing.

Better customer experience

Automatically filling the dispenser eliminates manual filling and the interruptions it causes customers, often at peak usage periods. Additionally, scheduled maintenance can be performed out of the way of customers, allowing the dispenser to be used without disruption.
