Consumer-preferred Chewblet ice (UM models)

- preferred over cubes by more than 2:1
- easy to chew
- slow melting, maintains drink temperature and quality, comparable to cubes
- higher displacement than cube ice

Flake ice (UF models)

- high surface area chills quickly, maintains products at desired temperature
- molds well, securely holds containers without slipping
- shields products against damage in displays

Efficient dependable design

- stainless steel evaporator, auger and top bearing provide durability
- oversized, heavy duty, tapered roller bearing ensures long low-maintenance life
- semi-automatic cleaning cycle reduces maintenance costs
- regular flushing improves ice quality and reduces scale

Environmentally responsible

- R290 refrigerant has low environmental impact and nominal global warming potential
- energy-efficient, no costly defrost cycles
- 25% less energy than comparable capacity cube machines
- 40% less water than comparable capacity cube machines

Designed for easy installation and service

- front ventilated - no side clearance required
