Welcome

Follett equipment enjoys a well-deserved reputation for excellent performance, long-term reliability, and outstanding after-the-sale support. To ensure that this product delivers that same degree of service, we ask that you take a moment to review this manual before beginning the installation. Should you have any questions or require technical help at any point, please call our technical service group at (877) 612-5086 or +1 (610) 252-7301.

Before You Begin

After uncrating and removing all packing material, inspect the equipment for concealed shipping damage. If damage is found, immediately notify the shipper and contact Follett Corporation so that we can help in the filing of a claim, if necessary. If needed, the serial number of your dispenser can be found by removing the drip tray and locating the serial number label. A QR Code is located on the right hand side of the drip tray. This code allows you to access manuals, technical bulletins, and on-line training related to the 7 Series and 15 Series dispensers.

Check your paperwork to verify that you received the correct dispenser. Follett configuration numbers are designed to provide information about the type of dispenser you are receiving. The following is an explanation of the different model numbers.

Important Safety Information

Please read and adhere to the following safety information while installing, using, or servicing your Follett Ice Dispenser.

1. Always disconnect power before servicing the dispenser.
2. Ice is slippery. Maintain counters and floors around dispenser in a clean and ice-free condition.
3. Ice is food. Follow the recommended cleaning and sanitizing instructions to maintain cleanliness of delivered ice.

</table>

* Use outside of these limitations is misuse and will void warranty.
† Best performance is achieved between 80 F (27 C) and 50 F (10 C).

Plumbing

- Water Inlet: 1/4" MPT
- 1/2" bin drain line must slope 1/4" per foot (6 mm per 30.4 cm run).
- Optional Drain Accessory Kit (item# 00956375 or 00981977): 1/2" ID tubing
- Water shut-off recommended within 1.5 m (5 ft.) of dispenser
Specifications

Water

⚠️ WARNING!

Connect to potable water supply only.

- Water Mineral Content:
  - TDS: greater than 5 ppm (mg/l) but less than 400 ppm (mg/l)
  - Hardness: Less than 200 mg/l (12 gpg)
- Not recommended for use with softened water

Clearances

- 3" (77 mm) behind and on each side of dispenser for electrical and connection and ventilation

Electrical

- 115V, 60 Hz, 1 phase, 5A, maximum fuse 15A
- Connect to dedicated 15A circuit, fuse or breaker
- Must be grounded - requires 3-prong outlet. Do not remove ground.

Refrigeration

⚠️ WARNING!

Do not damage the refrigerant circuit. Refrigerant can cause personal injury and/or damage dispenser.

- Refrigerant R134a – 7.6 ounces (215 grams)

Heat Rejection

- 1700 BTU/hr (498 W)
Specifications (continued)

- 62.2 cm (24.50”)
- 57.2 cm (22.50”)

Notes:
- Freestanding models
- Countertop models
Installation

**CAUTION!**
No service or maintenance should be performed until the technician has thoroughly read this service manual. Except for routine cleaning and sanitizing, only qualified technicians should attempt to service or maintain this equipment.

Countertop Installation
1. A clearance of at least 3" (77 mm) is required behind and on each side of the dispenser for electrical connection and ventilation (Fig. 1).
2. Rough-in the electrical service and water line.
   - Electrical: 115 V, single phase, 15A receptacle required. The dispenser has an integral 8 ft. (2.4 m) cord and plug.
   - Water: supply line (with shut-off valve) connects to the dispenser's 1/4" MPT inlet.

**NOTICE!**
If installing optional Drip Tray Drain Kit or Leg Accessory, complete those steps before proceeding.

3. Connect water line.
4. Connect to the 1/2" ID drain line (Fig. 2.1) (barb fitting provided) and route to customer drain. Drain line must slope 6 mm per 30,4 mm run (1/4" per foot).
5. Install the storage bin drain tube pinch clamp (Fig. 2.2). Clamp can be installed externally or internally. To install internally, see Accessing Internal Components on page 11.
6. Connect power supply.
7. Sanitize the dispenser prior to use (see Page 13).

![Fig. 1](image1.png)
![Fig. 2](image2.png)
Optional Leg Accessory Installation

**CAUTION!**

*Use caution when tipping the dispenser during leg installation. Do not lay unit on back or side. DO NOT EXCEED 30° angle. Tipping more than 30° can result in compressor malfunction.*

1. If installing optional 4" Leg Accessory (item# 00956300), place a 5" (127 mm) spacer underneath the dispenser to ease installation.

2. Remove four plastic, thread-protecting plugs from bottom of dispenser.

3. Screw each leg into chassis *(Fig. 3).*

---

**Optional Internal Water Filter Installation**

If your dispenser has the internal water filter option, the water filter must be installed for the dispenser to operate. Because internal components will need to be accessed for both procedures, Follett recommends installing the water filter just prior to initial sanitizing.

1. If installing the optional internal water filter, please complete the steps shown in *Accessing Internal Components on page 9* before proceeding.

2. Lift and remove the top panel, set aside *(Fig. 4.1).*

3. Remove two screws *(Fig. 4.2)* and remove left side panel.

4. Install filter as shown. Turn filter clockwise until it is fully seated *(Fig. 4.3).*
Maintenance/Cleaning Mode

Cleaning Mode (Dispensing Disabled) - Use when cleaning surface
Entering Cleaning Mode disables the User Interface and allows you to clean the outside of the dispenser without accidentally dispensing water or ice.

1. To enter Cleaning Mode, press and immediately release the maintenance/clean switch (Fig. 5.1) so that only "FRESH FILTERED ICE AND WATER" displays in the user interface (Fig. 5.2).

2. To exit Cleaning Mode, press and immediately release the maintenance/clean switch so that the ice and water icons also display in the user interface.

Maintenance Mode (All Operations Disabled) - Use when cleaning ice machine
Entering Maintenance Mode disables all operations and allows you to safely clean and/or sanitize the icemaker and dispenser.

1. To enter Maintenance Mode, press and hold the maintenance/clean switch (Fig. 5.3) until displays in the user interface (Fig. 5.4).

2. To exit Maintenance Mode, press and hold the maintenance/clean switch until no longer displays in the user interface.

Note: Entering and exiting Maintenance Mode will reset the six-month periodic maintenance reminder.

Accessing Internal Components

CAUTION!
Except for routine cleaning and sanitizing, only qualified technicians should attempt to service or maintain this equipment.

1. Press and hold the maintenance/clean switch (Fig. 5.1) until displays in the user interface (Fig. 5.2).

2. Remove (unscrew) chrome ice dispenser chute (Fig. 6.1).

3. Remove the drip tray (Fig. 6.2).

4. Remove the two screws (Fig. 6.3) on the front panel (behind the drip tray).

5. Remove and set aside the front panel (Fig. 6.4) - do not disengage the plug on the back of the User Interface or the tubing at the water dispenser chute (if so equipped).
Filter Display Indicator Activation

If you purchased your dispenser with a Follett filter, the filter display indicator activation has been preset at the factory.

If you are using an “after market filter,” an adjustment may be made to activate the “Fresh Filtered Ice & Water” display.

Activating “Fresh Filtered Ice & Water”

1. Remove the front panel as explained in *Accessing Internal Components on page 9* then refer to *Fig. 7*.
2. Remove top panel (*Fig. 7.1*).
   - **Note:** For 15 Series dispensers, the right side panel must also be removed.
3. Remove (1) screw and top of control board enclosure (*Fig. 7.2*).
4. Locate the DIP switches on the dispenser’s control board (*Fig. 8*). Use a fine-pointed object to move the “Filter” DIP switch (DIP switch #3) to the ON position.

Deactivating the Six-Month Maintenance/Filter Change Reminder

1. Use a fine-pointed object to move the “PM” DIP switch (DIP switch #8) to the ON position.

### Table:

<table>
<thead>
<tr>
<th>OFF</th>
<th>ON</th>
</tr>
</thead>
</table>
| Not used (OFF position) | Ice and water Internal filter supplied or to display "Fresh Filtered"
| Ice only | 30 minute delay
| No internal filter | Six-month PM enabled
| Not used (OFF position) | Six-month PM disabled
| Not used (OFF position) | 15 minute delay
| Not used (OFF position) | Six-month PM enabled

---

*Fig. 7*

*Fig. 8*
NSF-approved Cleaning and Sanitizing Procedure

Cleaning and sanitizing should be performed at least every 6 months (more often if local water conditions dictate).

**WARNING!**
- Place the dispenser in Maintenance Mode prior to servicing or cleaning the ice machine. See Maintenance/Cleaning Mode on page 9.
- For protection, rubber gloves and safety goggles (and/or face shield) should be worn when handling SafeCLEAN Plus™.
- Do not use bleach, it will damage the dispenser.

**Required Supplies**
- Follett SafeCLEAN Plus solution. Use 100 F (38 C) water.
- Funnel, bucket, 38 C (100 F) potable water

**Ice machine and Dispenser**
1. Dispense all the ice out of the unit.
2. Press and hold maintenance/clean switch until displays in the user interface to enter Maintenance Mode.
3. Remove (unscrew) chrome ice dispense chute (Fig. 9.1).
4. Remove drip tray (Fig. 9.2).
5. Remove (2) screws located behind the drip tray (Fig. 9.3).
6. Move front panel and place on top or beside unit (Fig. 9.4).
7. Remove plug cap from the end of water reservoir drain tube (Fig. 9.5) and lower tube to drain water into bucket. After the system has been drained of water replace plug cap in water reservoir drain tube.
8. Secure tube in holder.
9. Remove cap from storage bin lid cover (Fig. 9.6).
10. Screw storage bin lid cover cap onto ice discharge chute (Fig. 9.7).
11. Locate the storage bin drain tube pinch clamp (Fig. 10) and engage (close).

12. Follow the directions on the SafeCLEAN Plus packaging to mix 6 gal. (22.7 L) of Follett SafeCLEAN Plus solution. Use 100 F (38 C) water.

13. Pour cleaning solution into bin lid access spout until solution reaches and remains level at the spout neck. (Because the cleaning solution reaches the internal components via overflow into the ice transport tube, it is necessary to add cleaning solution until it remains level at the spout neck.)

14. Allow the solution to remain in unit for 15 minutes.

15. While machine is cleaning, remove top and right side panel to access and clean air-cooled condenser.

16. Submerge ice dispense chute in the remainder of solution for 2 minutes. Rinse with clean, potable water.

17. Drain system: (1) release (open) the storage bin drain tube pinch clamp and (2) lower water reservoir drain tube into bucket.

18. Secure capped water reservoir drain tube into holder and engage (close) storage bin drain tube pinch clamp.

19. Fill and drain three times with potable water. Secure water reservoir drain tube and release (open) the storage bin drain tube pinch clamp.

20. Place a bucket under the dispense chute and remove cap. Note: Some solution will remain and drain out when cap is removed. Reposition cap on bin lid spout.

21. Reinstall front panel, ice dispense chute, and drip tray.

22. Press and hold maintenance/clean switch to exit Maintenance Mode.

**User Interface and Exterior Cabinet**

1. Press and release maintenance/clean switch so that only “FRESH FILTERED ICE AND WATER” displays in the user interface to enter Cleaning Mode (and disable dispensing).

2. Plastic parts, including the user interface, can be cleaned with a non-abrasive glass cleaner. Clean stainless steel panels with stainless steel cleaner.

3. Press and release maintenance/clean switch to put unit back into service.
**LED Indicator Description**
The LED Indicator is located behind the front panel.

Evaporator Disassembly

1. Disconnect power from the dispenser.
2. Turn off water supply to dispenser.
3. Remove (unscrew) chrome ice dispenser chute (Fig. 12.1).
4. Remove the drip tray (Fig. 12.2).
5. Remove the two screws (Fig. 12.3) on the front panel (behind the drip tray).
6. Remove and set aside the front panel (Fig. 12.4) - do not disengage the plug on the back of the User Interface.
7. Lift and remove the top panel, set aside (Fig. 12.5).
8. Remove two screws (Fig. 12.6) and remove left side panel.
9. Remove two screws (Fig. 12.7) and remove right side panel.
10. Unplug the gear motor (three connectors) (Fig. 13).
11. Remove ground screw connection.

12. Remove gear motor:
   - Remove M6 allen screw, retainer, spacer and key (Fig. 14.1).
   - Remove two M6x90 allen screws (Fig. 14.2).
   - Pull gear motor from auger (Fig. 14.3).
   - Remove main housing insulation (Fig. 14.4).

13. Remove all traces of petro-gel from auger shaft.

14. Remove compression nozzle:
   - Loosen hose clamp (Fig. 15.1).
   - Remove transport tube (Fig. 15.2).
15. Remove M6 socket head allen screw (Fig. 16.1).
16. Remove compression nozzle retainer (Fig. 16.2).
17. Remove compression nozzle (Fig. 16.3).

18. Remove main housing:
   - Disconnect vent line from T fitting (Fig. 17.1).

19. Remove three M6x25 socket head allen screws (Fig. 18.1).
20. Remove main housing (Fig. 18.2).
21. Remove and discard mating ring and seal (Fig. 19.1).
22. Carefully remove auger (Fig. 19.2).

**WARNING!**
*Use caution when removing auger. The auger is very sharp - handle with care to avoid personal injury.*

Evaporator Assembly
1. Remove and inspect main housing O-ring seal. Replace if damaged in any way.
3. Use cardboard disc to press new mating ring into main housing (Fig. 20.1).
4. Lube the shaft with liquid soap in the area shown (Fig. 20.2) and slip on seal and spring (Fig. 20.3).
   **Note:** Do not touch the sealing surfaces with bare hands. Contact with bare skin will cause premature seal failure.
5. Install auger (Fig. 20.4).
6. Install main housing:
   - Slide main housing onto auger shaft (Fig. 21.1).
   - Install three M6x25 allen screws (Fig. 21.2).
   - Connect vent line to T fitting (Fig. 21.3).
7. Install compression nozzle:
   - Remove and inspect compression nozzle O-ring seal. Replace if damaged in any way.
   - Install compression nozzle (Fig. 22.1).
   - Install compression nozzle retainer (Fig. 22.2).
   - Install M6 socket head allen screw (Fig. 22.3).

8. Install transport tube (Fig. 23.1).

9. Tighten hose clamp (Fig. 23.2).

10. Install gear motor:
    - Install main housing insulation (Fig. 24.1).
    - Slide gear motor onto auger shaft (Fig. 24.2).
    - Install two M6x90 allen screws (Fig. 24.3).
11. Use screwdriver to orient auger shaft to align with motor shaft keyway (Fig. 25.1).

12. Install key into keyway (Fig. 25.2).

13. Install spacer, ensure that key is captured in slot (Fig. 26.1)

14. Insert screwdriver into groove of auger shaft and pry shaft outwards (Fig. 27.1).

15. Insert retainer into groove (Fig. 27.2), ensure that retainer is aligned with hole in spacer.
16. Install screw and tighten (Fig. 28.1).

17. Plug in gear motor (Fig. 29).
   - BLUE to BLUE
   - BLACK to BLACK
   - WHITE to WHITE
   - Connect ground wire with ground screw.

Warranty Registration and Equipment Evaluation

Thank you for purchasing Follett® equipment. We hope you find that our equipment meets or exceeds your expectations, as our goal is to deliver high value products and services that earn your complete satisfaction!

Please review the enclosed installation and operations manual. It is important that the installation be performed to factory specifications, so your equipment operates to its maximum efficiency.

Follett LLC will not be liable for any consequential damages, expenses, connecting or disconnecting charges or any losses resulting from a defect of the machine.

For full warranty details, visit our website www.follettice.com/productwarranties.

Warranty registration and equipment evaluation is important to help us keep track of our equipment and to record the machine’s performance. We request that you register Follett equipment warranties on our website www.follettice.com/support and choose Warranty Registration and Equipment Evaluation. It’s simple to do; please take a moment to register today. There is also space on the form to provide us with comments and feedback. Please let us know about your experience so we can capture it for our continuous improvement efforts.

We pride ourselves on producing outstanding equipment and we work hard to back it up with outstanding customer and technical support. Please let us know what else we can do to assist you. We would be happy to answer your questions.
