

Bacterial-retentive in-line water filter system

Filter system

Symphony Plus™
ice and water dispensers

Assembly includes

- Kleenpak® 0.2 µm double layer sterilizing-grade disposable filter capsule with robust Supor® membranes
 - Validated according to industry standard test method (ASTM F838-15a), with complete retention of the challenge organisms
 - In-use evaluation performance supporting up to 6 months filter life
- Profile® II 1 µm absolute rated pre-filter cartridge, with depth-style polypropylene membrane for high performance particle removal
 - High efficiency pre-filtration ensuring removal of nutrient rich particulates
 - Barrier to protect the downstream sterilizing-grade filter capsule
- Shurflo® pressure regulator controls water pressure to a maximum of 50 psi

Benefits

- Supports ASHRAE 188 water management plans
- Validated barrier to waterborne bacteria from incoming water
- Retains microorganisms without volume restriction
- Non-carbon filtration, no use of glues and resins, reduces nutrient load
- Produces cost-effective, high purity effluent for ice and drinking water

Pall® Kleenpak water filters with 0.2 µm double layer sterilizing-grade media are rugged, high performance, self-contained filter capsules designed for use in critical in-line water applications.

Pall Profile II 1 µm absolute rated pre-filter cartridges are designed for high-performance clarification and particle removal.

For use with ice machines and ice and water dispensers in healthcare settings.
