Symphony Plus™ Pressurized Water Sanitizing Kit - FL4S System
P/N 01089572

Instructions

For use with systems with Follett filter

ATTENTION!
These instructions are for Symphony Plus dispensers only. Instructions for sanitizing Symphony Series dispensers are located on the reverse side of this document.

Description
Periodic cleaning/descaling and sanitizing of Follett's ice and water dispenser and ice machine system is required to ensure peak performance and delivery of clean, sanitary ice. Immediately perform Cleaning/Sanitizing procedure (according to instructions shipped with dispenser) when this Pressurized Water Sanitizing procedure is completed.

If you experience any problems during the installation process, please call Follett Technical Service toll-free at (877) 612-5086 or +1 (610) 252-7301 for assistance.

Materials Required
- (1) 1.5 Gallon (or larger) plastic bucket
- Sanitary gloves
- Safety glasses
- 1.6 fl oz of Nu-Calgon IMS-II Sanitizer (P/N 00979674 - 16 fl. oz bottle)

Materials Supplied
(1) Dip Tube
(1) Bypass Plug
Sanitizing

CAUTION!

- Immediately perform Cleaning/Sanitizing procedure (according to instructions shipped with dispenser) when Pressurized Water Sanitizing procedure is completed.
- Only qualified technicians should attempt to service or maintain this equipment.
- Wear rubber gloves and safety goggles (or face shield) when handling cleaner or sanitizer mixtures.
- Use only Follett approved cleaners.
- It is a violation of Federal law to use Sanitizing solution in a manner inconsistent with its labeling.
- Do not use solvents, abrasive cleaners, metal scrapers or sharp objects to clean any part of the dispenser.

1. Unplug dispenser.
2. Turn OFF water supply (Fig. 1.1).
3. Open purge valve to relieve pressure (Fig. 1.2).
4. Remove primary cartridge (Fig. 1.3) and discard.
5. Install bypass plug in head assembly (Fig. 1.4).

6. Remove pre-filter bowl and discard pre-filter (Fig. 2).
7. Install dip tube (Fig. 3).

8. Mix a 200 ppm active quaternary sanitizing solution of 1 gal. (3.8 L) 100 F (38 C) water and 1.6 oz (47 ml) Nu-Calgon IMS-II Sanitizer (P/N 00979674).

9. Fill pre-filter bowl to just below the o-ring with sanitizing solution (Fig. 4).

10. Re-install pre-filter bowl (Fig. 5).
11. Turn ON water supply (Fig. 6.1) and wait for pre-filter bowl to fill completely.

12. Quickly open and close the purge valve 3 times (ending in the closed position) to bathe the valve and drain line in sanitizer (Fig. 6.2).

13. Be sure purge valve is closed.

15. Dispense 3 cups (24 oz) of water into a container (Fig. 7). Sanitizer will fill the dispenser water lines.

   **Note:** Maximum length of water line between dispenser and filter system must not exceed 30 ft. (9 m) in order to ensure complete sanitizer fill of water system.

17. Remove the front cover and set aside.

18. Locate the ice machine electrical box (Fig. 8.1) and press CLEAN switch (Fig. 8.2). The MAINTENANCE light will turn on and the machine will drain.

19. Wait for the LOW WATER light to turn on.

20. Locate the dispenser electrical box and ensure that the BIN SIGNAL switch is ON.

21. Unplug the dispenser, wait 5 seconds and plug back in.

22. Ice machine will resume ice making mode (wait for MAKING ICE light to turn on) and sanitizer will fill the ice machine water lines and also the water reservoir.

23. Unplug unit and allow sanitizer to remain in water lines and water reservoir for at least 5 minutes.

24. Open the purge valve (Fig. 9) for 60 seconds to drain the sanitizer from the pre-filter bowl.

26. Plug in dispenser and dispense water into a container for 30 seconds (Fig. 10) to flush sanitizer from the dispenser water lines.

27. Discard water collected in container.

28. Press the CLEAN switch to purge sanitizer from the water reservoir.

29. Wait for the LOW WATER light to turn on.

30. Unplug the dispenser, wait 5 seconds and plug back in.

31. Ice machine will resume ice making mode (wait for MAKING ICE light to turn on) and flush water reservoir lines.

32. Turn OFF the BIN SIGNAL switch.

33. Turn OFF water supply.

34. Open purge valve to relieve pressure.

35. Close purge valve.

36. Remove pre-filter bowl and standpipe.

37. Install new pre-filter and pre-filter bowl.

38. Remove bypass plug and install new primary filter.

39. Flush primary filter if necessary according to manufacturer’s instructions.

40. Immediately perform Cleaning/Sanitizing procedure according to instructions shipped with dispenser.
24. Plug into dispenser and dispense water into a container for 30 seconds (Fig. 10) to flush 30 sec water from dispenser lines.
25. Discard water collected in container.
26. Drain water for 30 seconds from the water reservoir by releasing evaporator drain into a container.
27. Plug drain hose, replace drain tube in (undermounting, pinch clamp (if equipped), removing plug from drain tube and reassembling drain tube from float reservoir bracket.
28. Turn OFF water supply.
29. Open purge valve to relieve pressure.
31. Remove pre-filter bowl and standpipe.
32. Install new pre-filter and pre-filter bowl.
33. Remove bypass plug and install new primary filter.
34. Flush primary filter if necessary according to manufacturer’s instructions.
35. Immediately perform Cleaning/Sanitizing procedure according to instructions shipped with dispenser.
36. Perform Cleaning/Sanitizing procedure according to instructions shipped with dispenser.
17. Remove any panels required to gain access.

18. Locate the Compressor Switch and put in the OFF position.

19. Draw 2 cups (16 oz) of water from the water reservoir bracket.

20. Plug drain hose and replace drain tube in Overflow bracket.

21. Unplug unit and allow sanitizer to remain in tank for at least 5 minutes.

22. Open the purge valve (Fig. 9) for 60 seconds.

Note: Consult the Operation and Service Manual before installing evaporator drain tube, and to water reservoir, evaporator drain tube, and
